- Prevent Multiple Booking
- Cancel Your Booking
- Book A Room
- Indication of State of Room
- NUSNET ID Login

We are already here...

GG can I have a better system???

Problems With the Current System:

PAPER ON THE DOOR!

- **For the students:**
  - Time consuming
  - System easily exploited without any cost:
    - Multiple bookings by the same group
    - Inability to regulate and monitor bookings and cancellations The room resources are allocated unfairly
  - Insecure System--- the paper schedule is easily lost or tampered with

- **For the administration staff:**
  - Strenuous to monitor the state of the rooms
